## Front View of Spa

**Note:**

1. Subject to change without notice.
2. Engineering specs may differ slightly from brochure.
3. For E-Z lifter installation allow 18" (45.7cm) clearance on the backside of the spa.
4. Alternative cabinets may add significant weight. Ask your dealer for exact details.
5. This is the approximate location for drilling a hole if you must bring the power line in through the bottom of the spa. Be careful not to puncture a plumbing line inside the equipment compartment (drill from the inside compartment out).

**\*Caution:**

Due to manufacturing tolerances there could be some minor differences between the actual spa and the drawing above. **If site planning is critical to such tolerances, be sure to measure your actual spa.**
