On ENERGY STAR® Certified Variable-Speed Pool Pumps

Why choose ENERGY STAR?

ENERGY STAR pool pumps are independently certified to save energy and money.

In fact, they:

- Use up to 65% less energy than conventional pool pumps*
- Can save up to \$445 per year in energy bills*
- Run quieter and extend the life of your pool's filtering system*

Conventional pool pumps waste energy by using the same pump speed whether they are filtering the water, vacuuming the pool or performing another task. ENERGY STAR certified variable-speed pool pumps run at lower speeds during filtration, the task pool pumps perform most often. Because filtration requires only half the flow rate of pool vacuuming, these variable-speed pumps can provide significant savings over time.

Save money

An ENERGY STAR certified variable-speed pool pump can save you up to \$2,200 over the lifetime of the product.* This investment can pay for itself in less than two years, and even sooner with a Consumers Energy rebate.

When do you need a new pool pump?

Unless the motor is completely dead, it can be difficult to determine when to replace your pool pump. However, there are other warning signs of which you should be aware, including if your pool pump:

- Is 7-10 years old
- Continually makes noise
- Gets hot and shuts down
- Hums or buzzes but will not start
- Starts slowly

Eligibility requirements

- Applicant must be a Consumers Energy residential electric customer.
- Pump must be an ENERGY STAR certified variable-speed pool pump, replacing a pool pump on an existing pool. Newly installed pools are not eligible for rebate.
- Limit one pool pump rebate per year, per household.
- Pool pump must be purchased and installed in 2020.
- Application must be postmarked within 30 days of installation.
- Rebate paid will not exceed the purchase price of the pool pump, excluding taxes, shipping and installation charges.
- Rebate eligibility requirements are subject to change without notice, including early termination of this program.

How to apply

Please be sure to include a legible copy of your entire sales receipt with your application submission. The receipt or paid invoice must include the sales date, manufacturer, model number, installation date, purchase price and vendor name. Please retain a copy of the receipt and application for your records.

Submit your application online at:

ConsumersEnergy-appliancerebates.com

Download the application form at:

ConsumersEnergy.com/poolpump

Mail your application to:

Consumers Energy
ATTN: Appliance Rebates
3131 S. State Street, #309
Ann Arbor, MI 48108

Please allow 6–8 weeks for payment (in the form of a check). Payment processing may take longer if information is missing on the application. Please call 866-234-0445 if you have any questions about your rebate.
